No. 7. SERIES 1911–1912

MONTHLY SUMMARY

OF

COMMERCE AND FINANCE

OF THE

UNITED STATES

JANUARY, 1912

WASHINGTON
GOVERNMENT PRINTING OFFICE
1912

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term *"entry for consumption"* is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported, that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space etc.

Weights.—In all tables published by the bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and corn meal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

JANUARY SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for January, 1912, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; and IX. Ocean freight rates.

The unit of weight used in the Summary of Internal Commerce is either the "long" ton of 2,240 pounds or the "short" ton of 2,000 pounds. The term "net ton" is used exclusively to denote the unit of vessel measurement (100 cubic feet of carrying capacity, exclusive of space occupied by cabins, machinery, etc.).

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-two different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for the month of January and same period of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for the month of January at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities; thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business—i. e., quantities actually unloaded at local elevators or warehouses—and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

Shipments by rail of pine lumber as reported by the Northern Pine Manufacturers' Association for January, 1912, were 66,726,465 feet—40 members reporting—in comparison with 82,125,550 feet with 42 members reporting for January, 1911.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during January. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During January transactions at 29 ports of receipt and 20 ports of shipment were reported. The number of vessels arriving in January was 964, and the departures numbered 973. The net registered tonnage for the month was as follows: Arrivals, 1,051,791 net tons; departures, 1,063,425 net tons. These totals do not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC FOR THE MONTH OF JANUARY, 1908–1912.

A summary of the lake traffic for January, compared with the corresponding months in 1908, 1909, 1910, and 1911, is given in the following table, which groups the 16 items, for which figures are presented in the subsequent tables, under six more general heads reduced to their equivalents in short tons. The item "Grain and flaxseed" is exclusive of bran and millstuff, which is comprised under unclassed freight. The item "Coal" is composed of anthracite and bituminous coal. The class "Ore and minerals" includes pig iron and iron manufactures. The item "Lumber" is exclusive of logs which are reported separately to this office and are included under unclassed freight. The latter class includes a large number of items such as: Fire wood, pulp wood, ties, cement, sand, oil, stone, etc. It also includes the item of package freight, which is commercially the most important item.

COMPARATIVE SUMMARY OF DOMESTIC LAKE TRAFFIC FOR THE MONTH OF JANUARY, 1908–1912.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during January, 1907, 1908, 1909, 1910, 1911, and 1912. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News, to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, the following figures of the coastwise coal movements have been obtained. These statistics cover probably more than 90 per cent of the shipments at the places and for the periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and, to a small extent only, anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The figures given include domestic shipments by water proper, as well as amounts of bunker coal supplied to vessels in the domestic and foreign trades. In the case of New York the figures include also the quantities of anthracite and bituminous coal shipped across the river for local consumption in Greater New York and vicinity. No account is taken of the quantities of coal transported by float to railroad terminals.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio Rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac Rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburgh, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi Rivers; the traffic movements on New York State canals; and the Delaware & Chesapeake Canal, connecting the Chesapeake and Delaware Bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are compiled are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Big Sandy River for January, 1912, was at Lock No. 2, where 11,161 short tons of freight passed, all of which was miscellaneous merchandise.

The maximum tonnage on the Black Warrior River for January, 1912, was at Lock No. 5, where 6,931 short tons of freight passed, of which 400 short tons were coal and 6,531 short tons were miscellaneous merchandise.

The maximum tonnage on the Cumberland River for January, 1912, was at Lock No. 3, where 21,641 short tons of freight passed.

Upstream tonnage on the Kentucky River during January, 1912, was largest at Lock No. 1, where 4,163 short tons of freight passed, of which 3,600 short tons were coal and 563 short tons were miscellaneous merchandise. Downstream tonnage at Lock No. 12 aggregated 3,439 short tons of miscellaneous freight. The grand total freight passing in both directions at locks of maximum tonnage was 7,602 short tons.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 45,057 short tons mined in the first and second pools during January, makes a total coal traffic of 609,057 short tons for the river during January. Of other downstream freight 16,054 short tons of miscellaneous merchandise are to be added, making a total of 625,111 short tons in January. Lock No. 3 represents approximately the general aggregate of downstream tonnage.

Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in January amounted to 35,169 short tons.

The total freight moved in both directions, on this basis of calculation, was 660,280 short tons in January, 1912, as against 1,032,227 short tons in January, 1911; 856,410 short tons in January, 1910, and 877,471 short tons in January, 1909.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local

movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the month of January, 1912, of the vessels and barges reported 45 were loaded with coal; 14 with lumber, logs, and piling; 19 with merchandise; 4 with rock; 3 with corn; and 5 with wire and nails.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima, Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

PRODUCTION AND SHIPMENTS OF CONNELLSVILLE (PA.) COKE.

The following table presents figures of production and shipments of Connellsville coke from Connellsville proper and the so-called Lower District, as reported in the weekly issues of the Connellsville Courier. The figures represent estimates of the Courier, verified by and combined with the actual tonnage figures of the local railways.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude oil from southeastern Ohio and Lima-Indiana crude oil from northwestern Ohio; the Indiana Pipe Line Co., which receives crude oil from Indiana and Illinois; and the Prairie Oil & Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude oil, and its Lima-Indiana crude oil was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

IX.—OCEAN FREIGHT RATES.

The monthly range in ocean freight rates on staple products, for comparative periods of two years, between important Atlantic and Gulf ports and Europe, is shown in tables for Boston, New York, Baltimore, and New Orleans. In the Baltimore table, unless otherwise specified, rates in the United States currency are in cents per 100 pounds and those in English sterling per long tons of 2,240 pounds.

COMMERCE OF ALASKA, CALENDAR YEAR 1911.

[The following statement of the business of the customs district of Alaska was furnished by J. R. Willis, collector of customs of that district.]

The imports and exports of Alaska, when taken together, show a prosperous business condition tending toward a steady increase and a balance of trade gradually augmenting in favor of the district. This balance has been increasing for several years until now the exports have more than doubled the imports.

The imports of foreign gold, exports of the same to the United States, and the exports of merchandise to foreign ports, as shown in the followiug table, constitute, in the main, commerce which is passing through the district. The merchandise exported foreign is mostly the product of the States, but the domestic exports are nearly all of Alaska origin.

As the district produces but a few items of the necessities of mankind and the population remains practically stationary, the only causes which bring about an unusual increase of the general business of one year over another are iustallations of new enterprises and increased production of precious metals or fish products. The completion of such installations or a falling off iu these products will cause a decrease.

The following tables show a decrease in shipments of precious metals, whalebone, and some other items, but the increase in copper ore and fish more than covers the loss and raises the value of exports to the highest point in the history of the district. The increase in fur shipments over last year is due to the inclusion of the product of the Pribilof Islands.

A considerable falling off in shipments from the United States will be noted this year, which is accounted for in the changed business conditions and smaller demand for supplies occasioned by the lack of development in the southern and Bering Sea divisions. Southeastern and central Alaska have more than held their own, but the increase is insufficient to overcome the losses elsewhere in the district.

PASSENGER MOVEMENT DURING CALENDAR YEAR 1911.

The following table of passenger movement indicates the travel, by regularly established routes, to and from the district and the Yukon territory. Tourists, and cannery employees bound for remote places, are not included.

The Eagle and Dawson movement shows the local frontier travel, which must not be considered with the general account, as the greater number of those passengers arrived or departed from Ketchikan or St. Michael and have been accounted for in their returns.

[1] The figures of the latest year are largely preliminary and subject to correction.
[2] Exclusive of Alaska and Islands belonging to the United States.
[3] Census figures, relating to Continental United States; the figures for 1910 and 1911 represent estimates.
[4] Census figures.
[5] True valuation of real and personal property.
[6] 1901.
[7] 1791 to 1840, outstanding principal of the public debt, Jan. 1.
[8] 1791.
[9] Figures for the years 1791 to 1850 include the total public debt.
[10] 1791 (34 months).
[11] 1793–1795.
[12] Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.
[13] As the result of a special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of $9,700,000 was made in the estimate of subsidiary silver.
[14] Includes notes of Bank of United States; State-bank notes; demand notes of 1862 and 1863; fractional currency, 1863 to 1878; Treasury notes of 1890, 1891 to date; and currency certificates, act of June 8, 1872, 1892 to 1900.
[15] Individual and other.
[16] Data of the Department of Agriculture, representing wealth production on farms. Figures for 1910 include products fed to live stock.
[17] 1901. Exclusive of neighborhood industries and hand trades, included in previous years.

BUREAU OF STATISTICS
O. P. AUSTIN, CHIEF OF BUREAU

No. 8. SERIES 1911–1912

MONTHLY SUMMARY

OF

COMMERCE AND FINANCE

OF THE

UNITED STATES

FEBRUARY, 1912

WASHINGTON
GOVERNMENT PRINTING OFFICE
1912

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term *"entry for consumption"* is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported: that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of August 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel—Wheat flour, rye flour, and corn meal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 280 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

FEBRUARY SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for February, 1912, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for February and the two months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig iron production; and IX. Ocean freight rates.

The unit of weight used in the Summary of Internal Commerce is either the "long" ton of 2,240 pounds or the "short" ton of 2,000 pounds. The term "net ton" is used exclusively to denote the unit of vessel measurement (100 cubic feet of carrying capacity, exclusive of space occupied by cabins, machinery, etc.).

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-two different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for February and two months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

This movement includes receipts and shipments for February and two months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities; thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business—i. e., quantities actually unloaded at local elevators or warehouses—and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during February and two months ending February. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During February transactions at 15 ports of receipt and 15 ports of shipment were reported. The number of vessels arriving in February was 642, and the departures numbered 638. The net registered tonnage for the month was as follows: Arrivals, 745,338 net tons; departures, 740,358 net tons. These totals do not include the tonnage of vessels engaged in the trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, FEBRUARY AND TWO MONTHS ENDING FEBRUARY, 1910-1912.

A summary of the lake traffic for February, and season ending February 29, 1912, compared with the corresponding periods in 1910 and 1911, is given in the following table, which groups the 16 items, for which figures are presented in the subsequent tables, under 6 more general heads reduced to their equivalents in short tons. The item "grain and flaxseed" is exclusive of bran and mill stuff, which is comprised under unclassed freight. The item "coal" is composed of anthracite and bituminous coal. The class "ore and minerals" includes pig iron and iron manufactures. The item "lumber" is exclusive of logs, which are reported separately to this office and are included under "Unclassed." In addition to logs, the latter class includes a large number of items such as firewood, pulp wood, ties, cement, sand, oil, stone, etc. It also includes the item "package freight," which is commercially the most important item.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during February and two months ending February, 1910, 1911, and 1912. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News, to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, the following figures of the coastwise coal movements have been obtained. These statistics cover probably more than 90 per cent of the shipments at the places and for the periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and, to a small extent only, anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The figures given include domestic shipments by water proper, as well as amounts of bunker coal supplied to vessels in the domestic and foreign trades. In the case of New York the figures include also the quantities of anthracite and bituminous coal shipped across the river for local consumption in Greater New York and vicinity. No account is taken of the quantities of coal transported by float to railroad terminals.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio Rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac Rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

The statistics in this report for 1911 are subject to slight corrections in the full report to be published about the 1st of May. Included in the figures for 1911 are 239,146 bales which ginners and delinters estimated would be turned out after the time of the March canvass. Round bales included in above statistics are 100,439 for 1911; 112,887 for 1910, and 150,690 for 1909. Sea-island bales included are 119,252 for 1911; 90,368 for 1910; and 94,791 for 1909. Linter bales included are 546,769 for 1911; 397,628 for 1910; and 313,478 for 1909. The average gross weight of the bale for the crop, counting round as half bales and including linters, is 504.8 pounds for 1911 compared with 501.7 for 1910; and 496.6 for 1909. The number of ginneries operated for the crop of 1911 is 26,340 compared with 26,234 for 1910.

The statistics of cotton consumed and stocks held at mills and in independent warehouses and other public-storage places shown in this report were collected by canvasses of the mills and of the warehouses, but the stocks shown under the classification "Elsewhere" were arrived at by deduction, this being the difference between the total supply and the sum of the quantities exported and consumed during the period and that held by manufacturers and warehousemen at the close of the period.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

[1] Includes shipments from British Columbia to Alaska, which amounted to 52,418 feet in 1911.

The shipments from British Columbia to local, domestic, and foreign points in 1911 amounted to 50,182,203 feet, and those from Washington and Oregon to foreign points, 436,686,256 feet, making the total local, domestic, and foreign shipments from British Columbia, Washington, and Oregon in 1911, 1,630,288,194 feet as compared with 1,574,119,519 feet in 1910. The total amount of lumber inspected in 1911 as reported by the above-named bureau was 1,264,363,324 feet.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburgh, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi Rivers; the traffic movements on New York State canals; and the Delaware & Chesapeake Canal, connecting the

Chesapeake and Delaware Bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are compiled are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Black Warrior River for February, 1912, was at Lock No. 4, where 4,644 short tons of freight passed, of which 10 short tons were coal and 4,634 short tons were miscellaneous merchandise.

The maximum tonnage on the Cumberland River for February, 1912, was at Lock No. 3, where 13,887 short tons of freight passed.

Upstream tonnage on the Kentucky River during February, 1912, was at Lock No. 1, where 5,984 short tons of freight passed, of which 4,600 short tons were coal and 1,384 short tons were miscellaneous merchandise. Downstream tonnage at Lock No. 12, aggregated 3,409 short tons of miscellaneous freight. The grand total of freight passing in both directions at locks of maximum tonnage was 9,393 short tons.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1, represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 39,152 short tons mined in the first and second pools, makes a total traffic of 450,352 short tons. This total, plus 12,932 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic for February, 1912—463,284 short tons.

The total freight moved in both directions, on this basis of calculation, was 492,339 short tons in February, 1912, as against 1,077,381 short tons in February, 1911, and 969,860 short tons in February, 1910.

For two months ending with February the total movement was 1,152,629 short tons in 1912, 2,109,608 short tons in 1911, and 1,826,270 short tons in 1910.

The upstream freight passing this point for two months ending February, 1912, amounted to 64,224 short tons.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For two months ending with February, 1912, of the vessels and barges reported, 82 were loaded with coal; 23 with lumber, logs, and piling; 10 with railroad ties; 31 with merchandise; 7 with rock; 13 with corn; and 5 with wire and nails.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima, Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude oil from southeastern Ohio and Lima-Indiana crude oil from northwestern Ohio; the Indiana Pipe Line Co., which receives crude oil from Indiana and Illinois; and the Prairie Oil & Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude oil, and its Lima-Indiana crude oil was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

IX.—OCEAN FREIGHT RATES.

The monthly range in ocean freight rates on staple products, for comparative periods of two years, between important Atlantic and Gulf ports and Europe, is shown in tables for Boston, New York, Baltimore, and New Orleans. In the Baltimore table, unless otherwise specified, rates in the United States currency are in cents per 100 pounds and those in English sterling per long tons of 2,240 pounds.

[1] Exclusive of Alaska and islands belonging to the United States.

[2] Census figures, relating to Continental United States; the figures for 1910 and 1911 represent estimates.

[3] Census figures.

[4] True valuation of real and personal property.

[6] 1904

[7] 1791 to 1840, outstanding principal of the public debt, Jan. 1.

[8] 1791.

[9] Figures for the years 1791 to 1850 include the total public debt.

[10] 1791 (34 months).

[11] 1793 1795.

[11] Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

[12] As the result of a special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of $9,700,000 was made in the estimate of subsidiary silver.

[13] Includes notes of Bank of United States; State-bank notes; demand notes of 1862 and 1863; fractional currency, 1863 to 1878; Treasury notes of 1890, 1891 to date; and currency certificates, act of June 8, 1872, 1892 to 1900.

[14] Individual and other.

[15] Gold values, being 80 per cent of currency values reported.

[16] Includes value of buildings, $4,556,639,490. The Twelfth Census was the first to collect statistics of buildings on farms.

[11] Includes value of buildings, $6,325,451,528.

[18] Data of the Department of Agriculture, representing wealth production on farms. Figures for 1910 include products fed to live stock.

[12] Exclusive of neighborhood industries and hand trades, included in previous years.

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term *"entry for consumption"* is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheads, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States. (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of Aug. 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel: Wheat flour, rye flour, and corn meal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

G. A. Weber, Chief, Division of Internal Commerce.

MARCH SUMMARY OF INTERNAL TRADE MOVEMENTS.

The summary of Internal Commerce for March, 1912, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for March and the three months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig iron production; and IX. Ocean freight rates.

The unit of weight used in the Summary of Internal Commerce is either the "long" ton of 2,240 pounds or the "short" ton of 2,000 pounds. The term "net ton" is used exclusively to denote the unit of vessel measurement (100 cubic feet of carrying capacity, exclusive of space occupied by cabins, machinery, etc.).

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-two different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

40792°—No. 9—12——14

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for March and three months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

These movements include receipts and shipments for March and three months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities; thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business—i. e., quantities actually unloaded at local elevators or warehouses—and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

[1] For live-stock and grain movements at St. Louis, see pages 1492 and 1494, respectively. [2] Includes through movements.

Receipts at St. Louis by river from January 1, to March 31, 1911, were as follows: 68 sacks wheat, 132 sacks corn, 8 sacks oats, 1,105 bales cotton, 3,200 pounds hides, 13,500 pounds meats, 500 pounds wool, 498 head cattle, 263 head sheep, 4,672 head hogs, and 63 head horses and mules. Shipments during this period were 2,000 pounds hams, 7,100 pounds lard, 7,200 pounds meats, and 40 head horses and mules.

Receipts for the same period in 1911 were 999 sacks wheat, 7,634 sacks corn, 36 sacks rye, 879 bales cotton, 5,500 pounds hides, 6,400 pounds meats, 3,600 pounds wool, 659 head cattle, 453 head sheep, 9,615 head hogs, and 68 head horses and mules. Shipments for the same period were 185 barrels flour, 20 sacks bran, 24,200 pounds hams, 5 short tons hay, 50,000 pounds lard, 80,700 pounds meats, and 102 head horses and mules.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during March and three months ending March. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During March transactions at 13 ports of receipt and 14 ports of shipment were reported. The number of vessels arriving in March was 651, and the departures numbered 641. The net registered tonnage for the month was as follows: Arrivals, 907,849 net tons; departures, 898,138 net tons. These totals do not include the tonnage of vessels engaged in the trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, MARCH AND THREE MONTHS ENDING MARCH, 1910–1912.

A summary of the Lake traffic for March, and season ending March 31, 1912, compared with the corresponding periods in 1910 and 1911, is given in the following table, which groups the 16 items, for which figures are presented in the subsequent tables, under 6 more general heads, reduced to their equivalents in short tons. The item "grain and flaxseed" is exclusive of bran and mill stuff, which is comprised under unclassed freight. The item "coal" is composed of anthracite and bituminous coal. The class "ore and minerals" includes pig iron and iron manufactures. The item "lumber" is exclusive of logs, which are reported separately to this office and are included under "Unclassed." In addition to logs, the latter class includes a large number of items such as firewood, pulp wood, ties, cement, sand, oil, tone, etc. It also includes the item "package freight," which is commercially the most important item.

COMPARATIVE SUMMARY OF DOMESTIC LAKE TRAFFIC, MARCH AND THREE MONTHS ENDING MARCH, 1910–1912.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during March and three months ending March, 1910, 1911, and 1912. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News, to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, the following figures of the coastwise coal movements have been obtained. These statistics cover probably more than 90 per cent of the shipments at the places and for the periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and, to a small extent only, anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The figures given include domestic shipments by water proper, as well as amounts of bunker coal supplied to vessels in the domestic and foreign trades. In the case of New York the figures include also the quantities of anthracite and bituminous coal shipped across the river for local consumption in Greater New York and vicinity. No account is taken of the quantities of coal transported by float to railroad terminals.

Arrivals for a similar month in 1911 totaled 13,449 head, divided into 10,069 cattle, 3,175 hogs, 5 sheep, and 200 milch cows; and for 1910, of the total of 15,492 head, 11,649 were cattle, 3,442 hogs, 99 sheep, and 302 milch cows.

For 13 weeks ending March 27, 1912, arrivals of live stock at New Orleans reached a total of 55,577 head in comparison with 46,714 head in 1911 and 48,947 head for 1910. Of the present year's total, cattle constituted 34,143 head; hogs, 20,491 head; sheep, 165 head; and milch cows, 778 head; while a corresponding movement for the same period last year of cattle totaled 35,413, hogs 10,379, sheep 266, and milch cows 656 head; and for 1910, the number of cattle reported was 38,724, hogs 9,270, sheep 173, and milch cows 780.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac Rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

During the corresponding period in 1911 the shipments amounted to 67,025 cars, which were distributed as follows: New England States, 641; New York, 661; Pennsylvania and New Jersey, 936; West Virginia and Maryland, 489; Michigan, 1,013; Ohio, 2,081; Indiana, 2,652; Illinois, 5,052; Iowa, 2,123; Minnesota, 147; Wisconsin, 429; Missouri, 4,426; Kansas, 2,843; Nebraska, 1,474; Colorado and South Dakota, 307; Oklahoma, 3,688; Texas, 7,486; Tennessee and Kentucky, 1,356; New Mexico, Arizona, and Mexico, 740; local, 7,013; export, 5,946; domestic, 723; not specified, 14,799.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

SHIPMENTS OF LUMBER FROM PACIFIC NORTHWEST.

The number of mills reported should be taken account of in connection with tho figures in the above table. During the three months ending with March the average number was 46 in 1911 and 32 in 1912, or 14 less in 1912 than in 1911.

Shipments of pine from the Pacific Northwest during the three months ending with March, amounted to 6,718 cars, and were distributed as follows: Local, 2,249; North Dakota, 380; South Dakota, 446; Minnesota, 496; Wisconsin, 345; Iowa, 461; Illinois, 315; Kansas, 14; Nebraska, 385; Missouri, 12; Colorado, 199; Wyoming, 52; Utah, 208; Michigan, 58; Ohio, 76; Indiana, 16; Atlantic Coast States, 219; other eastern States, 121; Canada, 569; Nevada, 1; and unclassified, 96.

During the corresponding period in 1911 the shipments amounted to 6,912 cars, and were distributed as follows: Local, 2,407; North Dakota, 381; South Dakota, 949; Minnesota, 348; Wisconsin, 312; Iowa, 616; Illinois, 325; Kansas, 46; Nebraska, 521; Missouri, 26; Colorado, 237; Wyoming, 89; Utah, 127; Michigan, 48; Ohio, 21; Indiana, 18; Atlantic Coast States, 79; other eastern States, 46; Canada, 315; and Nevada, 1.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburgh, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi Rivers; the traffic movements on New York State canals; and the Delaware & Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are compiled are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Black Warrior River for March, 1912, was at Lock No. 4, where 5,253 short tons of freight passed, of which 600 short tons were coal and 4,653 short tons were miscellaneous merchandise.

The maximum tonnage on the Cumberland River for March, 1912, was at Lock No. 3, where 19,618 short tons of freight passed.

Upstream tonnage on the Kentucky River for March, 1912, was largest at Lock No. 4, where 11,983 short tons of freight passed, of which 10,800 short tons were coal and 1,183 short tons were miscellaneous merchandise. Downstream tonnage at Lock No. 12 aggregated 6,553 short tons of miscellaneous freight. The grand total of freight passing in both directions at locks of maximum tonnage was 18,536 short tons.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 34,801 short tons mined in the first and second pools, makes a total traffic of 1,046,201 short tons. This total, plus 18,479 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represent approximately the general aggregate of downstream traffic for March, 1912—1,046,201 short tons.

The total freight moved in both directions, on this basis of calculation, was 1,126,279 short tons in March, 1912, as against 1,116,708 short tons in March, 1911, and 1,194,712 short tons in March, 1910.

For three months ending with March the total movement in both directions was 2,278,898 short tons in 1912, 3,226,316 short tons in 1911, and 3,020,982 short tons in 1910.

The upstream freight passing this point for three months ending March, 1912, aggregated 125,823 short tons.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The table following is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For three months ending with March, 1912, of the vessels and barges reported, 212 were loaded with coal; 51 with lumber, logs, and piling; 14 with railroad ties; 60 with merchandise; 7 with rock; 26 with corn; 7 with wire and nails; and 1 with oil.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima, Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in th Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

Th pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude oil from southeastern Ohio and Lima-Indiana crude oil from northwestern Ohio; the Indiana Pipe Line Co., which receives crude oil from Indiana and Illinois; and the Prairie Oil & Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude oil, and its Lima-Indiana crude oil was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplu oil, which, combined with net stocks, constitute gross stocks.

[1] Exclusive of Alaska and Islands belonging to the United States.

[2] Census figures, relating to Continental United States; the figures for 1910 and 1911 represent estimates.

[3] Census figures.

[4] True valuation of real and personal property.

[5] 1904.

[6] 1791 to 1840, outstanding principal of the public debt, Jan. 1.

[7] 1791.

[8] Figures for the years 1791 to 1850 include the total public debt.

[9] 1791 (34 months).

[10] 1793–1795.

[11] Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about $25,000,001, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

[12] As the result of a special investigation by the Director of the Mint, a reduction of $135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of $9,700,000 was made in the estimate of subsidiary silver.

[13] Includes notes of Bank of United States; State-bank notes; demand notes of 1862 and 1863; fractional currency, 1863 to 1878; Treasury notes of 1890, 1891 to date; and currency certificates, act of June 8, 1872, 1892 to 1900.

[14] Individual and other.

[15] Gold values, being 80 per cent of currency values reported.

[16] Includes value of buildings, $3,556,639,496. The Twelfth Census was the first to collect statistics of buildings on farms.

[17] Includes value of buildings, $6,325,451,528.

[18] Data of the Department of Agriculture, representing wealth production on farms. Figures for 1910 include products fed to live stock.

[19] Exclusive of neighborhood industries and hand trades, included in previous years.
